NATIONAL GEOGRAPHY STANDARDS BINGO

Directions: To see how geography relates to the challenges and opportunities facing our world every day, find one related article, editorial, graphic, or photo example in The New York Times for each item below, and write in a headline or description. When you have a diagonal, horizontal or vertical row of examples, you have "BINGO!"

Each of the concepts in the squares below was taken from the National Geography Standards.

Uses a map to communicate information	Describes the physical and human characteristics of a place	Describes a challenge related to human migration	Illustrates how nations are economically interdependent	Describes how communities and states cooperate in providing relief efforts during and after natural disasters
Gives an example of how human actions modify the physical environment	Describes how human settlement patterns have changed over time	Describes the human or physical characteristics that define a region	Gives an example of how culture and experience influence people's perceptions of places and regions	Discusses a landform that was shaped by physical processes, such as the water or erosion cycles
Describes the characteristics of an ecosystem on Earth's surface	Shows how culture shapes a group's way of life and its own view of itself and other groups	FREE SPACE	Includes a description of a place written in vivid language	Describes how people adapt differently to different physical environments
Discusses a renewable or nonrenewable resource people use	Refers to a human- created border that people are fighting about	Describes how jobs in a local community have changed over time	Explains why a human settlement is where it is	Describes a benefit or opportunity related to human migration
Shows the way land is used differently in a city or town	Describes how the introduction of a new technology is changing a culture	Describes the impacts that human dietary choices have on the physical environment.	Refers to a geographic factor that influences the construction of a new building, highway, or other human creation	Refers to transportation networks that allow goods and services to move between places
